NIGHTSTICK® TAKES LIGHTING SOLUTIONS TO THE XTREME

NIGHTSTICK Introduces XL Dual-Light Line-up

Bringing lighting solutions to market that offer unlimited possibilities to a range of industries is something NIGHTSTICK®, a leading brand of professional lighting solutions from Bayco Products, Inc., has been doing since its inception. The Nightstick brand has the most durable, reliable, far-reaching Dual-Lights™, flashlights, and headlamps in the industry. With today's announcement, Nightstick delivers its brightest Dual-Light flashlight-floodlight combo to date—taking sight and safety to a whole new level.

The **NSR-9924XL** and **NSR-9944XL** are the newest editions to the Nightstick line of dual-lights and the first within the duty/personal-size category. Both come with a sharp-focused LED flashlight that utilizes a high-efficiency deep parabolic reflector designed for distance illumination, paired with a second, unfocused LED floodlight for close-up task illumination. Users now have the exclusive ability to use these two lights (once only available for use individually) independently or simultaneously in one dual-light product. The flashlight body switch or tail switch provides momentary or constant-on functionality, as well as a set of user-selectable high, medium, or low-brightness settings that also includes a disorienting strobe.

Using the flashlight, which is powered by a CREE® LED rated at 650 lumens, users will experience a usable beam rated at 275 meters (902 feet). Such focused illumination provides the ability to see more at a greater distance. The floodlight provides users with a wide, even, unfocused light rated at 600 lumens, making it possible to see and do more up-close, and eliminating intense high-lumen bounce-back. In dual-light mode, users get the best of both worlds with 650 lumens while removing the need to carry two separate products.

"You use a flashlight differently than a floodlight, and that is why Nightstick is proud to feature the latest addition to the dual-light line-up of lighting products with the NSR-9924XL and NSR-9944XL models," says Russell Hoppe, Nightstick Marketing Manager. "Whether your need is a multi-functional flashlight to see long distances, a wide, even floodlight to illuminate your immediate surroundings, or both at the same time, the Nightstick NSR-9924XL and NSR-9944XL dual-lights provide all of the above and more in one single product. By combining an Xtreme Lumen product with the unlimited applications created by Nightstick's exclusive dual-light technology, you permanently upgrade the way professionals have in the past, are today, and will forever use lighting."

The NSR-9924XL has a rugged glass-filled nylon polymer housing, which greatly lightens the load placed on law enforcement duty belts while not compromising on grip, strength, or durability. It is also more comfortable to hold in cold conditions and it is scratch-resistant. For those who prefer a metal light, the NSR-9944XL housing, bezel ring, and tail-cap are made from aircraft-grade 6061-T6 aluminum. Both

products come standard with a Type 3 hard anodized finish on the tail-cap and bezel, while the NSR-9944XL offers a Type 3 hard anodized finish through-out.

The Nightstick NSR-9924XL and NSR-9944XL are IP-X7 waterproof and are serialized for personal identification. Both are powered by a Lithium-ion rechargeable battery (included) for increased run-time. Also included with each product is a wall/vehicle mountable charger, AC power supply, 12 volt DC power supply, and anti-roll ring.
