

Full Size Flashlight Designed For Professionals

The NSP-1160 and NSP-1260 represent the next generation of full-size flashlights for automotive, industrial, and security professionals. Bright light output, lightweight and long run-times make conventional tube style flashlights obsolete. The NSP-1160 and 1260 incorporate the Bayco exclusive *Dual-Light INNOVATION* that combines a super bright floodlight and a focused flashlight beam.

NSP-1160 • Black
NSP-1260 • Orange

- › 150 lumens flashlight
- › 120 lumens floodlight
- › 270 total lumens
- › Momentary flashlight operation for getting attention
- › Full & half power floodlight for extended run-time
- › Oval shape with non-slip textured body and soft-touch finish
- › Bright LEDs - 35,000 hour life
- › Rugged engineered polymer housing – impact / moisture and chemical resistant
- › Powered by 4 premium AA alkaline batteries (included)
- › Length: 10.9 in (277 mm) • Weight: 8.2 oz (232 g)

INCLUDED
4 Premium AA alkaline batteries
Dual position stand – 1160 & 1260 Removable magnetic clip - 1260
One year warranty (batteries excluded)
Meets European Community Directives

HANDS FREE LIGHTING

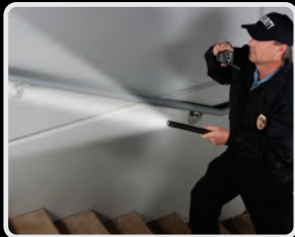

- › Stand - NSP-1160 & 1260
- › Magnetic clip - NSP-1260

NSP-1160 / 1260 Performance

Light Mode	Lumens	Run-Time Hrs
FLASHLIGHT • Constant	150	10
FLOODLIGHT • Full power	120	4
FLOODLIGHT • Half power	60	10
DUAL-LIGHT • Flashlight & Floodlight	270	3

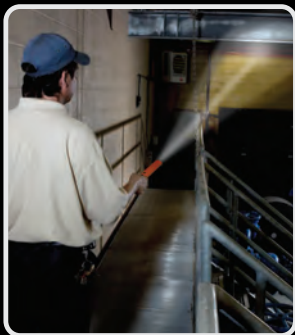

NSP-1160 / 1260

Flashlight • Floodlight • Dual-Light

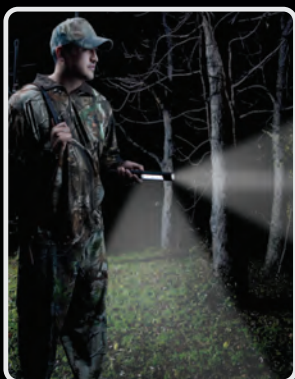

Flashlight

Focused beam with a bright center spot for distant illumination

Floodlight

Broad even lighting without the bright center spot for close-in illumination

Dual-Light

Activate both for maximum safety in work area or while moving

DUAL-LIGHT INNOVATION

For over 85 years flashlight functionality has not changed very much. Sizes and shapes have changed, but not the way a flashlight is used. Flashlights have always been used to spot objects at a distance... a task that most flashlights perform well. Flashlights are also used to illuminate objects at close range...something that conventional flashlights do not do well. Until NIGHTSTICK, there were few options.

Flashlight

NIGHTSTICK incorporates reflectors that capture and shape the maximum amount of available light from the latest high-output LEDs.

Flashlight

Floodlight

NIGHTSTICK incorporates a broad beam floodlight for the best lighting solution for wide-area or close-in viewing.

Floodlight

Dual-Light

Combining a separate floodlight with a flashlight into a single housing, is the NIGHTSTICK *Dual-Light INNOVATION*. The floodlight spreads the light over an area four times broader than the flashlight beam with no hot spots that impair visibility. Only NIGHTSTICK Offers Flashlight • Floodlight • Dual-light capability.
