
FOR IMMEDIATE RELEASE

**NIGHTSTICK IS-CERTIFIED 1100 LUMEN RECHARGEABLE SCENE LIGHT
BRINGS SAFETY AND CONVENIENCE IN PORTABLE LED PACKAGE**

*Long-lasting lithium-ion battery and rare-earth magnet fills the demand
for safety-certified portable, waterproof scene light*

Wylie, Texas – July 2019 - Nightstick, a global manufacturer of innovative, professional lighting products announces the availability of their new certified Class I, Div 2 Intrinsically Safe Nightstick [XPR-5590RX](#) LED Rechargeable Scene Light with Magnetic Base and Nightstick [XPR-5590RCX](#) Area Light Kit which includes a 6-foot tripod and durable carrying case.

With an impressive 1,100 lumens of light on high and 500 lumens on low, the portable and powerful Nightstick XPR-5590RX weighs only 3.3 pounds. Running up to 8 hours on a single charge from a powerful Li-ion battery, the XPR-5590RX also features a rare-earth magnet with a 10-pound pull force on a pivoting metal base. The light's perimeter is encased by a thick, molded rubber impact bumper to protect the tempered glass face and chassis from damage due to falls. With hands-free use and safety in mind, this IS-certified area light swivels independently in all directions to position light exactly where needed, and at angles not available in traditional fixed lighting or hand-held lanterns.

The lightweight 6061-T6 aluminum frame with finned heat sink keeps the light cool to the touch and the adjustable metal-reinforced handle provides versatility to carry, hang, adjust and reposition as needed in the field. Drop rated at 2 meters, rated IP-67 dustproof/waterproof and NFPA compliant, this is light ideal for hazardous locations, fire ground operations, and industrial settings.

“Building on the success of the 1,100 lumen Nightstick NSR-1514 scene light, the new XPR-5590RX fills a major gap in the fire safety market today by offering 1,100 lumens in a Class I, Div 2 rechargeable scene light package that no other LED lighting manufacturer currently offers,” says Russell Hoppe, Marketing Director for Nightstick. “We know firefighters need a convenient and safe flood light they can quickly deploy on scene so they can get on with the real task at hand. Adding protective carry cases and a six-foot tripod means this light arrives at any location ready to deploy when the apparatus arrives.”

The XPR-5590RX includes the LED area light and AC and DC power supplies in a rugged blow-

molded carry case. The XPR-5590RCX lighting kit includes the area light, a 6-foot aluminum tripod with cam-lock adjusters, AC & DC power supplies and carrying case.

Nightstick 5590RX and 5590RCX are both covered by a limited 1-year warranty. To learn more, please visit www.nightstick.com.
