FOR IMMEDIATE RELEASE

October 28, 2014 | Wylie, Texas

NIGHTSTICK® MT-100 MINI-TAC 2-AAA PENLIGHT LINE ADDS BLUE AND RED BODY CHOICES

Color-anodized aircraft-grade aluminum housing LED's still under \$14

Bayco Products, Inc. triples the choices in its handy Nightstick® Mini-TAC MT-100 LED Penlight series by adding red and blue color choices to the original black. While the anodized color changes the appearance of the aircraft-grade 6061-T6 aluminum case, the new [MT-100R](#) red-case and [MT-100BL](#) blue-case models have identical performance specs. 2 fresh AAA cells (included) drive its 100-lumen beam up to 44 meters and run for up to 1.5 hours.

These 5.4"-long, 0.6"-diameter penlight-format cases weigh just 0.8 ounces (without the AAA cells), are water-resistant (per the IP-X4 spec) and drop-rated to 2 meters. A large and textured tail cap switch offers both momentary and full-on control. In use, one of the most impressive attributes of these lights is the tight, bright focus of its beam, a result of the brand's hallmark attention to optics, in this case through a high-efficiency deep-parabolic reflector.

Their light source is a CREE® LED with a rated life of 50,000 hours. Its pocket clip is a broad, flat design that's less likely to permanently harm pockets while still retaining a firm grip.

Compared to the original pocket penlight, introduced in the early twentieth century, these are smaller, brighter, more efficient and more reliable. The penlight form factor has endured for so long a time because of its convenience and suitability to so large a variety of tasks.

"It's a true testament to a products quality when you immediately began working on adding additional colors to the line-up after based on overall customer demand" says Russell Hoppe, Marketing Manager for Nightstick. "The MT-100 is a work-horse of a penlight with 100 lumens of dependable consistency and convenience all for a down-to-earth average retail price of \$14 or less. You just can't beat the delivered quality of a Nightstick flashlight at a value price point that incredibly low."
