## FOR IMMEDIATE RELEASE

February 2015 | Wylie, Texas

### **NEW NIGHTSTICK® HANDS-FREE HEAVY-DUTY DUAL FLASHLIGHT STRAP KEEPS YOUR EYES ON, WHILE KEEPING YOUR HANDS OFF**

**Universal design will fit virtually any Fire Helmet or Hard Hat at extremely economical price**

Nightstick announced today its newest helmet accessory that makes mounting up to two 1.25" diameter flashlights on a helmet simple and most importantly affordable. The [NS-HSR1](#), better known as the Nightstick Flashlight Rubber Strap allows the safety-conscience worker the ability to direct their once handheld flashlights on virtually any Fire Helmet or Hard Hat in a forward facing direction while leaving both of their hands free for other tasks. With an average retail price of \$7 or below, the Nightstick NS-HSR1 is economical priced for mass appeal.

The new NS-HSR1 Heavy-Duty Dual Flashlight Strap is an eye-shaped silicone rubber thick-walled strap that fits around the dome of almost any adult hard hat or helmet (24"-34" circumference); each of 2 side extensions offer a pair of horizontal holes through which a flashlight (or similar shape up to 1.25" diameter) can be positioned. The strap is waterproof and chemical-resistant while meeting NFPA-1971-8.6 (2013 requirements). A plus for any environment is the NS-HSR1's rating for temperatures of over 500 degrees Fahrenheit.

Designed to stay in place even in wet conditions, the NS-HSR1 is sturdy, durable and ready for action. "The challenge of any forward directional flashlight is you still have to hold your flashlight tying up the use of one or more of your hands" says Russell Hoppe, Marketing Manager for Nightstick. "Now with the Nightstick HD Dual-Flashlight Strap, when you turn your head, the direction of the light turns with you keeping your eyes on the task at hand, while keeping your hands off your flashlight(s)."
