FOR IMMEDIATE RELEASE

October 21, 2014 | Wylie, Texas

New Nightstick® NSP-4612B Dual-Light™ Headlamp Turning Heads

Originally designed to aid smokejumpers, host of innovations make headlamp indispensable

Featuring Nightstick's exclusive Dual-Light™ technology, Bayco Products, Inc. has announced the newest addition to its Nightstick line-up of professional lighting products with the introduction of the Nightstick [NSP-4612B](#) Dual-Light Multi-Function Headlamp.

Originally developed to address and resolve issues commonly experienced by smokejumpers, the Nightstick NSP-4612B is primed to redefine mainstream headlamp usage with 5 unique lighting modes that extends and maximizes a user's run-time while delivering up to 175 rated lumens for 6.5 hours in dual-light mode.

Up front and prominently center, the NSP-4612B answers the need for user selectable light by utilizing top-mounted dual switches to provide a white spotlight for distance, a high and a low brightness white floodlight for close-up illumination, a red floodlight for night-vision preservation and dual-light capability of the spotlight working simultaneously with the white floodlight for maximum visibility. The adjustable ratchet-tilt head keeps its collection of bright CREE® LEDs nicely directed on the task at hand while maintaining a comfortable balanced fit that is required when wearing a headlamp for extended periods of time.

The battery pack is conveniently located behind-the-head and features a quick change 3 AA battery compartment that allows even those wearing heavy thick gloves the convenience to change batteries fast and without requiring a separate tool for access. The NSP-4612B is rated at IP-X7 waterproof, and includes 3 AA batteries and both a heavy-duty rubber head strap for use on a hardhat, and an elastic non-slip head strap for a hat or to be worn directly on the head.

"The toughest, most dangerous jobs demand the most rugged dependable gear available and no other audience challenges you more than that of firefighters" says Russell Hoppe, Marketing Manager for Nightstick. "Whether your need is to run 75 hours, cut through smoke, or preserve your night vision, the durability of the Nightstick NSP-4612B is all that you need and probably a lot more."
