FOR IMMEDIATE RELEASE

August 12, 2014 | Wylie, Texas

NIGHTSTICK® XTREME LUMENS LINE GETS ANOTHER ADDITION

NSR-9920XL Joins Dual-Light Line of Products

Following overwhelming response to last week's unveiling of two new Xtreme Lumens (XL) Dual-Light™ products, Bayco Products, Inc. today announced another professional lighting solution in its NIGHTSTICK® portfolio. The **NSR-9920XL** Polymer Multi-Function Rechargeable Dual-Light w/Magnet joins the duty/personal-size family of XL Dual-Lights, known for delivering outstanding performance, durability, reliability, and brightness that goes far beyond the industry standard.

The NSR-9920XL, like the NSR-9924XL and NSR-9944XL, is powered by a CREE® LED with 650 lumens output. When paired with a high-efficiency, deep parabolic reflector designed for distance illumination, the result is a beam distance of 275 meters (over 902 feet). The flashlight can be used independently or in tandem with the 600 lumen unfocused floodlight (achieves 650 lumens when used in tandem). The flashlight body switch provides momentary or constant-on functionality, along with the ability to choose from a number of brightness settings—high, medium, low, as well as a disorienting strobe—offering as much visibility, safety, and security as needed.

Not only does the NSR-9900XL family of products provide unmatched lighting solutions in the duty/personal-size category, but it also carries the NIGHTSTICK performance commitment to offer such functionality with reliability and durability. Like its fellow XL products, the NSR-9920XL has an IP-X7 waterproof rating, is serialized for personal identification, and is powered by a lithium-ion rechargeable battery, eliminating the need to replace bulbs or batteries. The NSR-9920XL, however, distinguishes itself from its family members with its construction of high-visibility red glass-filled nylon polymer housing and integrated powerful tail-cap magnet in the base.

"Our *NIGHTSTICK brand* is eliminating the status-quo industry misconception that routine flashlight maintenance is required," says Russell Hoppe, NIGHTSTICK Marketing Manager. "By using LED technology instead of bulbs, and including industry-leading rechargeable lithium-ion technology as standard equipment on the NSR-9920XL, users get a better quality product at a lower price. With the addition of a powerful magnet built into the tail-cap, the NSR-9920XL delivers 6 unique user-selectable lighting options in one completely hands-free product. This makes the NSR-9920XL the most versatile and affordable rechargeable dual-light, period."

Included with the NSR-9920XL is the lithium-ion rechargeable battery, charger, AC & DC power supplies, and the anti-roll ring standard.
