Nightstick Debuts Compact, Lightweight Long-Gun Weapon Lights
*New TWM-352 and TWM-852XL tactical models engineered exclusively
for use on rifles/carbines*

[Check out the installation VIDEO](#)

Wylie, Texas - August 2018 - Nightstick, a global manufacturer of innovative, professional lighting products is pleased to announce two new long-gun exclusive weapon lights, models TWM-352 and TWM-852XL. Both weapon lights feature a rear-mounted single, dual-action momentary and constant-on thumb button that provides the shooter immediate, tactile, click-action feedback.

Nightstick model **TWM-852XL** features an 850 lumen output rated for 1.75 hours, illuminating objects up to 245 meters (803+ feet) away. Nightstick **TWM-352** features a 350 lumen output rated for 2.5 hours, illuminating objects up to 215 meters (705+ feet). Weighing in at only 4.5 ounces, constructed of aircraft-grade aluminum and rated as IP-X7 waterproof, these weapon lights are designed and engineered for extended hard use and peace of mind. Both weapon lights feature screw-locked battery/switch panels instead of spring latches, eliminating recoil-generated failures.

“Building upon our success with our **TWM-350** and **TWM-850XL** dedicated weapon lights featuring our patented completely ambidextrous Dual-Dependent toggle switches for use on pistols, we knew long-gun firearms owners needed a similar lightweight, rugged weapon light that was designed with them in mind,” says Russell Hoppe, Marketing Director for Nightstick. “Leveraging the robust construction and high performance of our CREE® LED-equipped TWM-350 and TWM-850XL models, we created these two new weapon lights to provide long-gun owners a powerful, low profile, single push-button solution to target and background identification, *when life depends on light™.*”

Ready to mount out of the box with a pair of preconfigured cross-rail inserts, these weapon lights are ideal for use on rifles, carbines and other long guns featuring the universal MIL-STD 1913 Picatinny rail system.

The TWM-352 and TWM-852XL are both backed by a limited lifetime warranty and in addition to pre-installed cross-rail inserts, include two spare inserts and cap head screws, Allen wrench and two CR123 lithium batteries. To learn more, please visit www.nightstick.com.
