Wylie, Texas – November 2018 – When bright, hands-free lighting in hazardous work environments is needed, professionals turn to Nightstick for our intrinsically safe helmet-mounted work lights. Certified cETLus, ATEX, and IECEx intrinsically safe, these zero-band headlamps produce reliable, pure hands-free white light to illuminate the darkest work surfaces, walkways and service panels where explosive gases and dust may be present.

These headlamps feature a multi-position tilt head design and include an integrated stainless-steel clip for attachment to most hard hats using the included NS-HMC4 hard hat clip mount. The mount features a PSA adhesive backing (no drilling required) for quick and easy application. A single switch operates high and low brightness modes.

With a beam distance of 80 meters (263 feet), the [XPP-5450GC](#)'s spotlight produces a solid 90 lumens for 13.5 hours. When operating in 50-lumen low mode, runtimes increase to a shift-busting 22.75 hours, giving you peace of mind that you don't have to quit working to look for a spare light or replace batteries.

If you need even more power, Nightstick's [XPP-5452GC](#) headlamp generates a bright 180-lumen spotlight for 6 hours. Selecting its 90-lumen low mode stretches work time to 19 hours when the job demands longer on-site attention.

“Zero-band headlamps that are certified intrinsically safe just makes sense when you are already wearing a hardhat for safety,” says Russell Hoppe, Marketing Director for Nightstick. “These tough, lightweight headlamps clamp easily in place without any drilling or permanent modifications using our included mount, providing industrial professionals bright, dependable on-demand light that securely snaps onto your helmet, so you can focus on the task at hand with confidence.”

The XPP-5450GC and XPP-5452GC are IP-67 rated dustproof and waterproof. Both headlamps run on three AAA batteries (included) and feature a limited lifetime warranty. To learn more about these headlamps, visit www.nightstick.com

About NIGHTSTICK®
